ABOUT US

Established in 2006, we are a professional company that designs and manufactures high-end control room consoles and control room desk.

In recent years, with the continuous innovation of the company's research and development team, many new and innovative products have been developed! The product design combines ergonomics and product technology perfectly, using high-quality raw materials to create a smarter, more comfortable, more environmentally friendly and more humane control center.

Now we have production equipment "AMADA" AC2510NT CNC punching machine, Nissan "AMADA" RGM21003 CNC bending machine, domestic well-known brand CNC punching machine, CNC bending machine, stud welding machine, seamless welding machine and other supporting equipment.

Companies adhere to the "people-oriented, technology-leading, quality first, the pursuit of excellence" development policy, products are sold throughout the world, widely used in electric power, energy, transportation, communications, finance, government, aviation, chemical plant, smart city, railway dispatching center, media center, municipal anti-fraud center, airport, logistics, IT operations and other fields. We complete more than 100,000 projects.
